

High-Rise Access Software

- **HighRise** is designed for use in any multi-level apartment or condominium complex. It enables the expediting, control and monitoring of all visitor and vendor access. In addition to the security aspect of the software, improved efficiency is also incorporated using the package delivery and resident service modules.
- **HighRise** can be integrated with L.P.R. and Access Control to manage all traffic flow in and out of campus and parking facilities.

Custom Resident Website

- Full Website Functionality
